

# דרושים/ות סטודנטים/יות לתארים מתקדמים

## Master and PhD positions available

The **microbial ecology and evolution lab** at the Hebrew University (Rehovot campus) is seeking bright and motivated students.

Our lab combines **experiments and computation** to study how microbial communities form, function, and evolve.

Potential project topics include the spread of **antibiotic resistance** genes, and the evolution of **interspecies interactions**.

We welcome applicants with a background in microbiology, bioinformatics, bio-engineering, or physics.
